9:00 **Arrival, Check-In, and Breakfast Refreshments**

9:25 – 9:30 **Opening Comments**

9:30 – 10:30 **Talk Session 1**

9:30 – 9:50 Melina R. Uncapher, Stanford
From Negative to Positive: Harnessing the Ventral Parietal Attention System to Promote Rather than Detract from Episodic Encoding

9:50 – 10:10 Theodore Zanto, UC San Francisco
Neural suppression of irrelevant information underlies optimal working memory performance

10:10 – 10:30 Rachel Diana, UC Davis
Source memory: Unitized vs. nonunitized encoding

10:30 – 11:30 **Poster Session 1** (with refreshments)

- Anne Berry, UC San Francisco
- Deanna Novak, UC Santa Cruz
- Diane Marian, UC Berkeley
- Els van der Helm, UC Berkeley
- Ian M. Messenger, UC Davis
- Jacob Bollinger, UC San Francisco
- John Olichney, UC Davis
- Luke Jenkins, UC Davis

11:30 – 12:30 **Talk Session 2**

11:30 – 11:50 Amy Finn, UC Berkeley
Developmental changes in prefrontal and hippocampal connectivity during working memory: a longitudinal fMRI study

11:50 – 12:10 Karinna Hurley, UC Davis
Developmental Change in Infants' Visual Short-Term Memory for Location

12:10 – 12:30 Jesse Rissman, Stanford
Classifying the mnemonic status of single items based on distributed fMRI activity patterns

12:30 – 2:00 **Lunch**

2:00 – 3:00 **Talk Session 3**

2:00 – 2:20 Karen Taylor, UC Davis
Evidence for stimulus-specific contributions of MTL structures to recognition memory for faces and scenes

2:20 – 2:40 Ben Hutchinson, Stanford
Parietal contributions to episodic memory retrieval and visuo-spatial attention

2:40 – 3:00 Ellen Klostermann, UC Berkeley
Right Posterior Parietal Cortex Activity During Successful Retrieval of Non-Linguistic Auditory Stimuli

3:00 – 4:00 **Poster Session 2** (with refreshments)

- Chung-Hay Luk, UC Berkeley
- Cynthia M. Funes, CSU Northridge
- Fred Barrett, UC Davis
- Gwen Lawson, Stanford
- Ian Ramsay, UC Davis
- Kristen E. Lyons, UC Davis
- Michael T. Rubens, UC San Francisco

4:00 – 5:20 **Talk Session 4**

4:00 – 4:20 Indre Viskontas, UC San Francisco
Human medial temporal lobe neurons respond preferentially to personally-relevant images

4:20 – 4:40 Matthew S. Cain, UC Berkeley
When Practice Doesn't Make Perfect: Practice-Induced Task Switching Costs

4:40 – 5:00 Brice Kuhl, Stanford
Reward- and Interference-Based Modulations of Memory: Joint Contributions of Prefrontal and Mesolimbic Structures

5:00 – 5:20 Emily C. Jacobs, UC Berkeley
Hormonal and genetic influences on prefrontal cortical function

5:30 – **Dinner/Social Event**
Sudwerk Restaurant & Brewery
2001 Second Street in Davis
